

## Driving Comfort

In the quest for ergonomically designed vehicles, comfort became of paramount importance. Coupled with fresh design innovations, climate control has become one of the key selling points in many new automobiles.

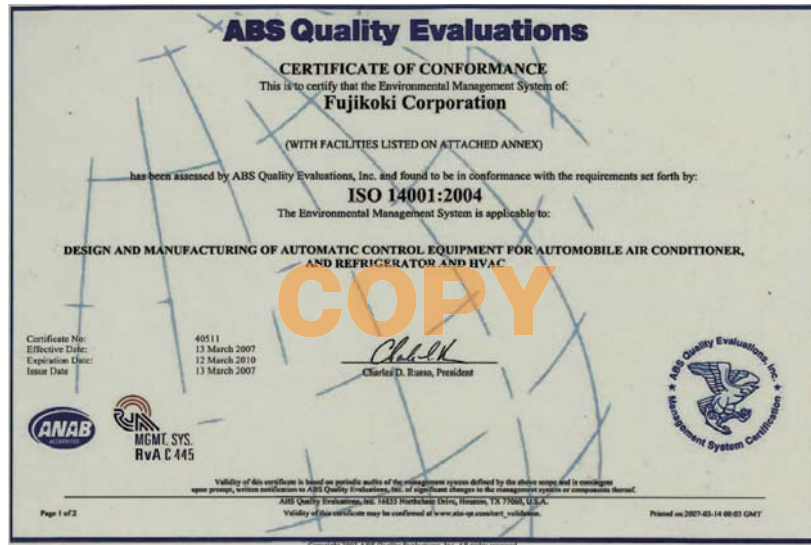

FUJIKOKI is dedicated to creating comfortable interior conditions for drivers and their passengers, thus ; providing optimum levels of satisfaction and safety

Whether it is driving on the open road or in the demanding stop and start traffic conditions of the city, the automatic controls for your auto's air conditioning are designed to meet the challenge when they have been manufactured by FUJIKOKI

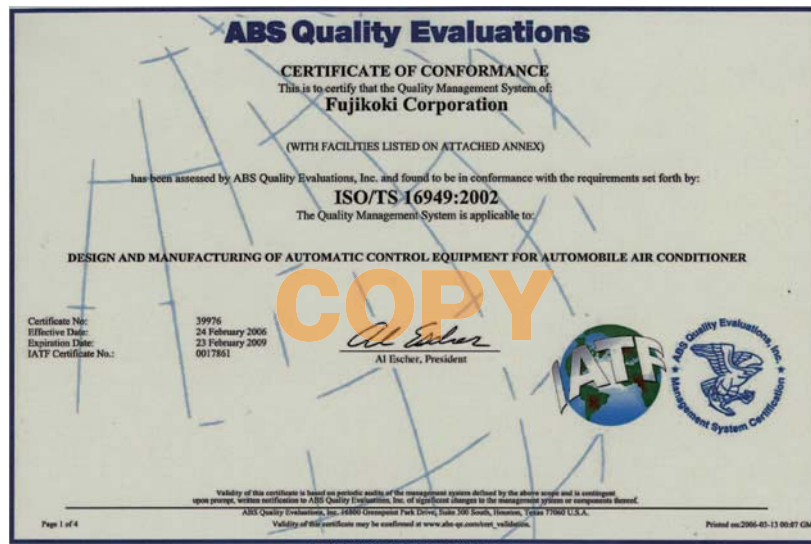

FUJIKOKI makes every effort and possible inspection in each production process to reach the stage of perfection. Such professional attitude and high quality products are widely recognized in market and adopted by car manufacturers in the world as OEM supplier.

## Registration with ISO 14001:2004

FUJIKOKI has been promoting “Human and Earth-friendly effort” during activities, including design, manufacturing and sales of products, for the environment under the social responsibilities as a company. They will aim to enrich the environment further, by having obtained ISO 14001:2004 Environmental system certification.

## Registration with ISO/TS 16949:2002

ISO/TS 16949:2002 specifies the quality system requirements for the design/development, production, installation and servicing of automotive-related products.

FUJIKOKI have been registered with such international and strict standards as ISO/TS 16949:2002 because of the reliability on their quality management and products established since the time of its foundation.
